

MTSS 301 Learning Goals 19-20

Module 1 Learning Goals:

- Understand the history of Multi-Tiered Systems of Support
- Understand the basic framework of Multi-Tiered Systems of Support
- Understand how to navigate and use BUZZ as a participant
- Understand where to locate tutorials for support programs
- Understand expectations for completing online portion of this 301 course

Module 2 Learning Goals

- Understand how differentiation supports all student achievement outcomes
- Understand the types of assessments and how their data drives Tier 1 support for all students
- Understand how Universal Design for Learning (UDL) supports all student achievement outcomes
- Understand how PBIS and Social Emotional Cognitive Learning (SECL) contribute to a strong Tier 1

Module 3 Learning Goals:

- Understand Tier 2
- Understand Tier 3
- Understand how tiers 2 and 3 look in elementary and secondary settings
- Understand how different assessment data is used to target supports
- Understand how SECL and behavior needs can be supported in tiers 2 and 3

Module 4 Learning Goals:

- Understand the major components to creating a positive classroom culture.
- Differentiate between situationally and universally inappropriate behaviors
- Examine why MTSS framework, differentiation, SECL, PBIS, and UDL are best practice
- Review recent neuroscience findings that inform how we target supports in MTSS
